STOCK MARKET DISPLAYS NO SIGN OF VITALITY.

HEAVINESS EARLY IN THE

HEAVINESS EARLY IN THE

DAY DISAPPEARS.

Principal Pressure on Metropolitan Street Railway — More

Gold to Go Abroad.

New York, May 6.—There was no sign of actual life in the stock market to-day and the feeble drift of prices never got far from last week's level. There was some heaviness early, but the level of prices came up later in the day. This is in accordance with the intermittent symptoms of the present market, declines of one day being merely the counteraction of a day before. Yesterday the excessive dullness was explained as being due to the departure of many brokers to a popular racing event, but to-day's dealings were no larger, with no such explaination to offer. The early heaviness was in symptoms larger, with no such explaination to offer. The early heaviness was in symptoms larger, with no such explaination to offer. The early heaviness was in symptoms larger, with no such explaination to offer. The early heaviness was in symptoms for the present market, declines of one day before. Testerday the excessive dull-heaviness was explained as being due to the departure of many brokers to a popular racing event, but to-day's dealings were heaviness of the present market, declines of one day before the excessive dull-heaviness and the feeble dull-heaviness a

racing event, but to-day's dealings were no larger, with no such explanation to offer. The early heaviness was in sympathy with the sharp decline in Metropolitan Street Haliway. The weakness of this stock has been a disturbing element for some time, but to-day's sening seemed based on State raliforal statistics published yesterday, showing the passenger traffic of the Metropolitan Company practically stationary for the last year. The deduction was drawn that the system had reached the practical limit of its carrying capacity.

MARKET INCONSISTENT.

The inconsistency of the market was shown by the sympathetic decline in the other traction stocks, although the same statistics showed a large increase in their traffic later in the day, when an upward movement in the other tractions was undertaken to give market reflection to the showing, Metropolitan Street Raliway recovered in sympathy.

The heavy gold outgo, the day's engagements reaching MISO,000, caused soms attention to be given to the bank statement prospects. The figures of Subtreasury figures do not include to day's large engagements of gold. The Subtreasury figures do not include to day's large engagements of gold. plus would not be a surprise in to-mor-row's bank statement. The statement of row's bank statement. The statement of Secretary Shaw regarding the Panama Canal payment was accepted to mean that £5,00,000 remained to be provided, which to-morrow's gold shipment of \$4,500,000 would go, of course, to reduce. The weather map was considered to show too much rain for wheat, and the wheat market acted accordingly. The stock market seemed not affected, except in the excessive duliness. Reports of railroad earnings were not stimulating to the demand for stocks, and those for the Harrigan group were considered a moderate basis for the hopeful views expressed by the head of the system. Outside a few of the stocks in the class known as specialties there was no movement worth notice, and the day's trivial changes were mostly gains. United States Steel second is were heavy on the supposition that the dissolution of the stock conversion syndicate will bring offerings on the market. Total sales of bonds par value. £550,000. United States bonds were unchanged on call.

and Miscellaneous Bonds Range Higher.

Activity of the traction issues again was the feature of the market for local securities. Though there was some selling of Transit and United Rallways preferred, the market closed higher than on the previous day and there was evidence of a steady increase of outside interest in this class of securities. The monthly report of the syndicate company was regarded as the syndicate company was regarded as bullish. Transit ranged from \$14.50 to \$14.50 at the morning session and United Railways preferred sold up to \$25.55. The 4-per-cent bonds were well taken at \$1.50 and \$1.50. Mercantile Trust, though not very active, was strong at \$25.50 and Missouri was steady at \$11.8. Central Coal and Coke common led the miscellaneous list, with sales at \$25.50 and \$2.75 and Missouri-Edison is at \$26.25 were strong.

OHIO CROP REPORT BRINGS OUT STRENGTH IN WHEAT.

DAMAGE TO GRAIN GREAT-EST IN YEARS.

Bank and Trust Company Shares Realizing Sales Toward the Close Check Advance-Heavy Selling Weakens Corn.

> Chicago, May 6.-The Ohio crop report was perhaps the chief factor in causing a strong wheat market to-day. At the close the price of July wheat showed a gain of 1421c. Corn is down 1421c. Oats are off WHEAT.

The opening in wheat was firm, under the influence of small receipts and higher prices in Liverpool. July being up it to ic, at Siye to Sile, imemdiately after the opening there was a short period of heeltation in the minds of traders, during which time the market assumed an easier turn, July selling off to Sile. The slightly bearish sentiment soon gave way, however, to a preponderance of builtsh crop advices, the first one of which was the Ohio crop report. Statistics in regard to the condition of winter wheat in that State showed marked deterioration, the figures being Si, compared with Si last month. Shorts and commission-houses became active buyers, and the market soon developed decided strength. Some impetus was given the upward trend by the strength of the Northwestern markets, notwithstandin the shutdown of the flour mills at Minneapolls. A general report on the condition of the winter crop issued by a well-known Chicago authority was decidedly builds. According to this expert a heavy falling off in winter wheat conditions was manifested in all stages east of the Mississippi River and north of the Ohio. Some States were said to show a decline of B to 15 points. The loss in the Ohio Valley, it was claimed, was the heaviert in many years. A partial confirmation of these figures was give. In a report from St. Louis by another crop statistician. Under this superabundance of adverse news the market continued to gain in strength until late in the session.

During the last haif hour realizing sales checked the advancing tendency, and caused a slight recession in prices, but the market consed strong. After selling up to \$5%c, July closed at \$5\times \$250.00. Under this superabundance of adverse news the market continued to gain in strength until late in the session.

During the kast haif hour realizing sales checked the advancing tendency, and caused a slight recession in prices, but the market conduction of wheat and flour for the week according to Bradstreet's were equal to 191,000 bu. Primary receipts were 162,000 bu. compared with 58.600 bu. a the influence of small receipts and higher prices in Liverpool. July being up he to

CORN. During the early part of the session shorts were active purchasers of corn. and in consequence the market ruled strong. The influences that brought out these buying orders were firm cables, small receipts and strength in wheat. Reports of a probably early settlement of the labor troubles connected with lake Reports of a probably early settlement of the labor troubles connected with lake navigation also had a stimulating effect on prices. On the advance there was heavy selling by pit traders, which caused weakness during the latter part of the day. The market closed near the low point. July opened a shade to be higher at 45% to 45% of the contract of the country of th

In sympathy with other grades, cats were strong early in the day. Later in the session quite a lot of long oats came out, and, while the oil crowd was inclined to the bull side the support from that source was not sufficient to check the declining tendency. All the early gain was lost, the market closing at about the low point. After opening be to be higher, at 30 kc. July ranged between 35 kc and

SUMMARY OF ST. LOUIS MARKETS

There was no decrease in the builish sentiment in yesterday's market. Though a considerable portion of the news was favorable to the seiling side, there were so many evidences of manipulation on the part of the big longs that prices again scored a good advance. Weather conditions were generally favorable, except in the Southwest. A short time ago this section was threatened with drought. Now the bullish information which comes from there is that there has been too much rain, and that in consequence of the excessive moisture replanting may be necessary. Many traders were apprehensive that the reports of the States in the winter belt will show a further retardation and deterioration of the crop, especially in the States east of the Mississippi River. Several "experts" were out with so-called forecasts of the Government report. As these came from manipulative sources, they all contained predictions that it would show a lowering of the average as compared with that posted last month. Efforts to enlist the interest of outsiders on the bull side were more successful than on the previous day, and there was a fair amount of commission-house buying.

Corn, though not so active, was strong in line with wheat. Wet weather in the central and southern portions of the belt was the main bullish influence. July wheat opened 146 %c up.

July corn opened Wake up. July pats closed unchanged.

Receipts of produce were moderate and prices of fruits and vegetables were gen-

Local securities were in good demand. Tractions were most active. Discount rates were steady between 5 and 6 per cent. Spot cotton was steady in the local market,

WHEAT FUTURES STRONG ON DAMAGE REPORTS.

OUTSIDERS SHOW CREASED ACTIVITY.

Corn. Though Dull, Also Is Strong on Prospects of Too

Future grain values continued on the upturn in yesterday's local market. Professionals were generally on the bull side and there was a better outside buying interest than for several days. While the volume of trading was not extremely heavy, offerings were so well absorbed that the few remaining shorts were anxious to cover. The Ghio State report showed a decline of 14 points since April L and similar bullish idvices came from several sources.

Much Moisture.

The Modern Miller said: Replies to numerous inquiries regarding change in the condition of the winter wheat crop during April show considerable wheat crop during April show considerable decline in Ohio, Michigan, Indiana, Texas, Oklahoma and the Indian Territories. Improvement is noted in Illinois, Missouri, Tennessee, Kentucky and Kansas, especially in Kansas, in the central and eastern section of the State. Conditions in the western part of Kansas are poor. In Indiana, Ohio, Michigan and Okiahoma a large acreage has been abandoned, but the loss eisewhere in this regard is small. All States report practically no old wheat held by farmers, except Kansas, and the reserves there are unusually small.

May wheat opened 140% up and sold at: 140444c, No. 135c, No. 140444c.

Too much moisture was the main bullish factor in the corn market. Receipts were small and there was a good call demand. The strength of wheat alded the upward movement in the coarse grain.

July corn opened hear at St. Louis 14,000 bu., of which 14 cars local and 2 cars through, against 31,577 bu., of which 22 sks, and 23 cars local and 12 cars through, against 31,577 bu., of which 25 sks, and 35 cars local and 12 cars through, against 31,577 bu., of which 25 sks, and 35 cars local and 12 cars through, in 1903. Receipts of wheat at primary points 142,000 bu., against 31,000 bu. in 1903, and shipments 185,000 bu., against 41,000 bu. Northwest receipts 51 cars, against 31 cars in 1903. Chicago received 25,000 bu. and Kansas City 18,000 bu. Clearances 161,000 bu.
